

# dream whisper ultra plush

## SEAQUAL™

In partnership with Seaqual™, every queen mattress helps pull 50 plastic water bottles from our oceans.

Dissipating heat when sleeping whilst conforming precisely to your body and slowly regain its original shape when you move.

Black Ice contains ceramic infusion which adds enhanced conductivity to the exceptional comfort and support characteristics of gel foam. Scientifically proven to be up to 20% cooler than traditional foam, which contributes to a much cooler, comfortable sleep.

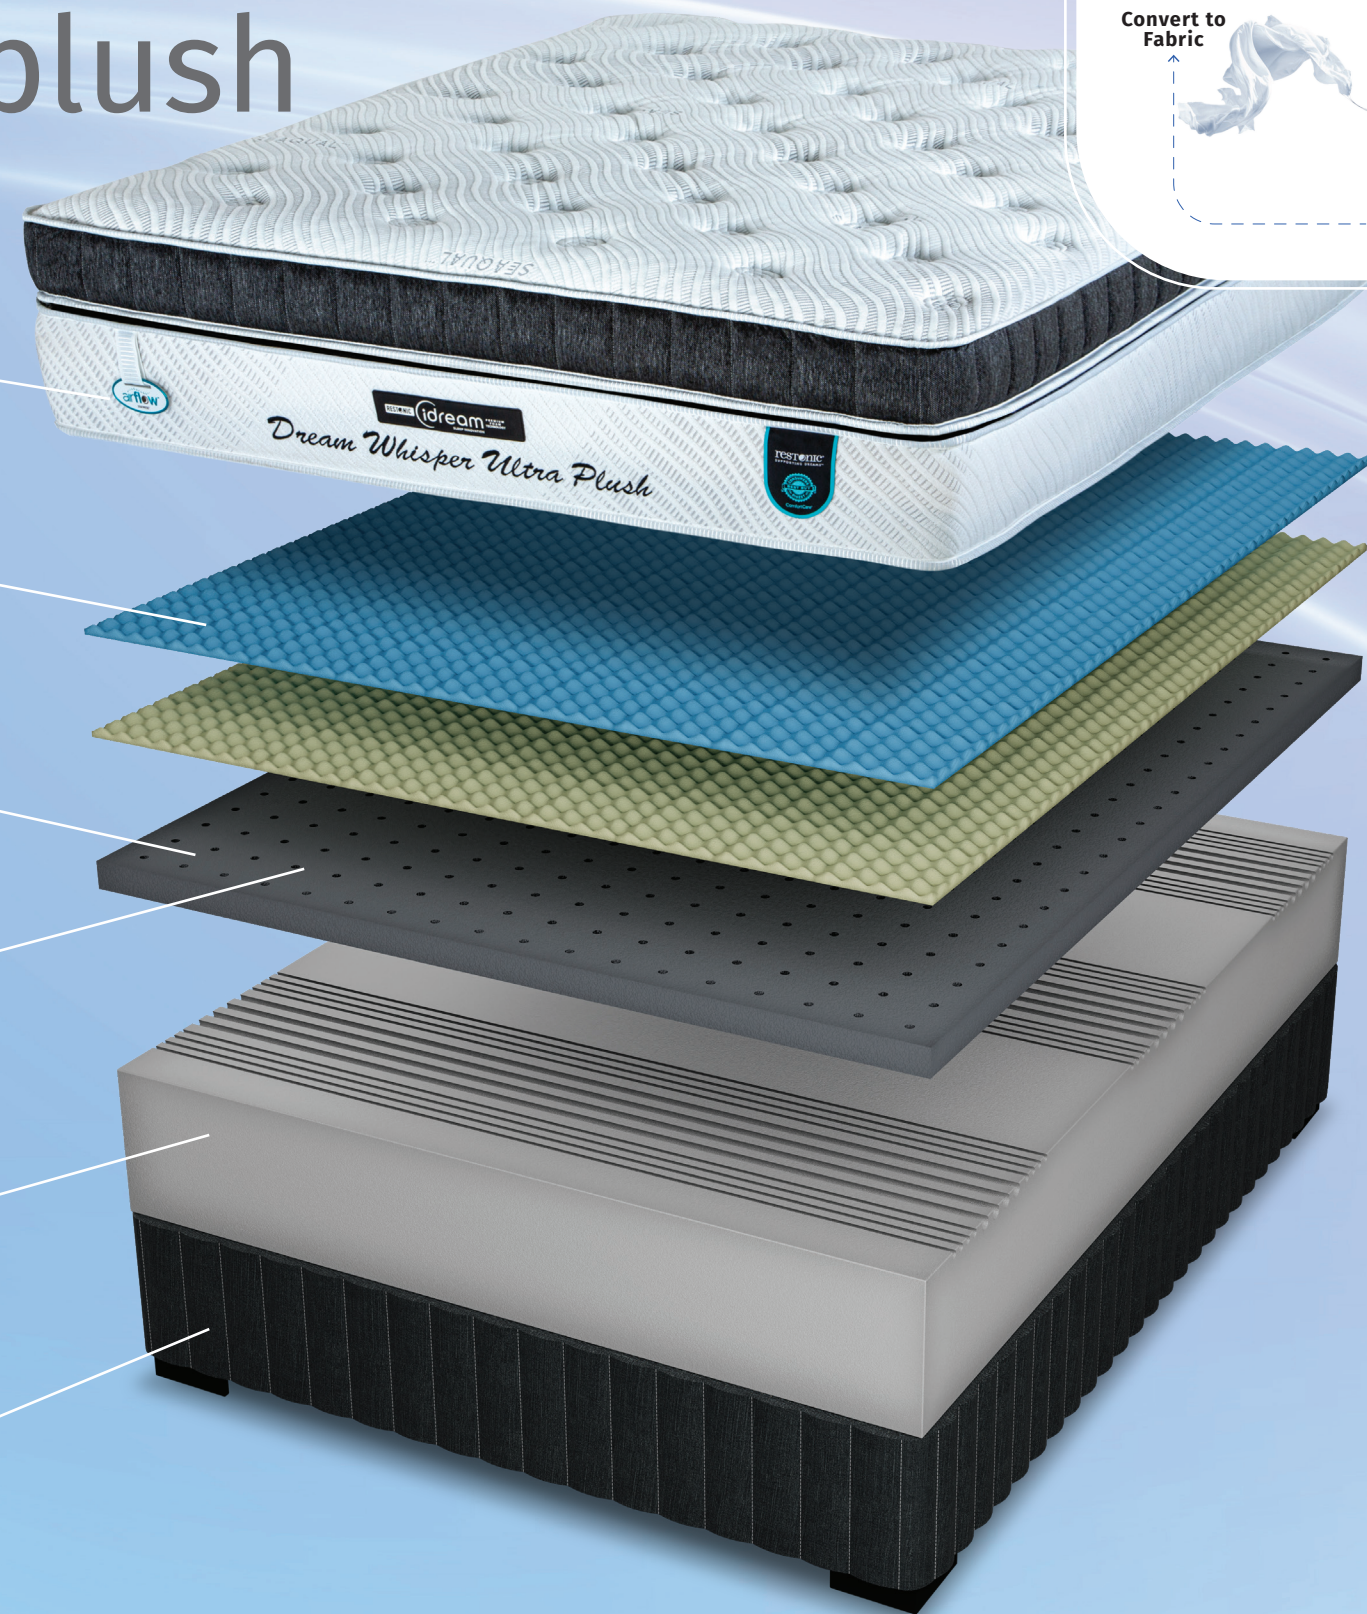

Our latest range of infused foams now incorporates aeration technology. It uses micro air channels, uniformly punched through the comfort layers, to further improve the thermal regulating and hygienic properties of the mattress through effective air flow.

Originally developed for the critical health care industry to ensure total comfort and support 24/7, Vitahealth is our ultra high density profiled foam designed with comfort and support in mind. With strategically placed profiles you will experience the ultimate balance between support and comfort where your body needs it the most.

### Fluted Base

Our luxuriously fluted bases are beautifully complimented with stylish legs the bedroom with a touch of class. Our bases are carefully designed to provide solid support ensuring longer lasting mattresses.
